1. Project Title and Authors

- a. Team 33
- b. The Wanginators
- c. Names and emails:
 - i. Anthony Tran: atran881@usc.edu
 - ii. Arsalan Ghogari: ghogari@usc.edu
 - iii. Himanshu Jain: jainhima@usc.edu
 - iv. Miheer Tongaonkar: mtongaon@usc.edu
 - v. Rishi Jain: rishij@usc.edu

2. Preface

- a. This document details Team 33's final sprint, which covers bug fixes, addition of new features, and improvement of old features. All scrum meetings (a total of 5) are documented to view progress from meeting to meeting, constructing a timeline that shapes how the sprint went overall. A final summary of the sprint is at the bottom of the document, which discusses some key questions listed in the 2.5 requirements document.

3. The Sprint Plan

- a. Product Backlog
 - i. **Bugs:**
 - 1. Currently there is a bug where if you enter search query, then delete the search query (so all notes should now be showing), then go to create a new note and go back to the home screen, you will find that the list of notes will show the results of the search query you previously deleted. The search bar is empty though, so the user may be extra confused as to why this is happening. A quick work around I made for the video was to add a space to the search bar and delete it, which seems to clear the invisible search query.
 - 2. Some test cases for Feature 2 are not passing for both white box and black box tests.
 - 3. Feature 6 black box test cases stall (run indefinitely) at the 2nd or 3rd test case when you try to run the entire test file. However, each test case passes individually when run one-by-one.
 - a. I'm assuming this is because some test cases are affected by the contents of the previous test cases,

causing some conflict, but I'm not totally sure so take it with a grain of salt.

4. After saving a note, it is expected that any stylized letters should also be saved (italics, bold), but that seems not to be the case – all styling is removed when viewing the note again
5. Places API stopped working
 - a. Fixed by relieving some restrictions on the key

ii. **Additional Features (Optional):**

1. Ability to change font types in note editor
2. Ability to highlight in note editor
 - a. Honestly I'm just looking at google docs' style options here
3. Add a location filter
 - a. We already have one, but I mean filter by specific locations (so only the locations that the user has already attached to their notes)
4. Add a drawing feature
 - a. The user can already add images, but it would be interesting for users to be able to draw something and add it in as an image like we can do in google docs
5. Ability to move images and voice memos around the note
6. Pomodoro Timer?
 - a. Suggested by the TA but I can't really think of a practical way to add this in. To me it just seems a little out of place.

iii. **Missing Features:**

1. Rich text support for creating new templates
2. Template based prioritization based on location
3. Ability to remove attachments (voice memo, images) from note

iv. **Nits (small things, not necessary to overall function):**

1. "Existing Tags:" subtitle in the Tag creation UI seems a little too left aligned when compared to the "Manage Tags" Tag Creation title. Same goes for template creation, but on a lesser scale
 - a. Try creating a tag and see what I mean.
2. The app asks you to enable notifications, but does not for location, which implicitly blocks a feature and the user may never know because they are never told.

3. Every time you go to update a note, it asks you if you want to update the location attached to your current location, but it should only do that upon saving.
4. The “last edited” time only shows the hour and minute you last edited, not the date, which makes it kind of confusing when looking at your notes day after day

b. Sprint Backlog

i. **Bugs:**

1. Search bug
2. Failing test cases
3. Style saving error
4. Places API error

ii. **Additional Features:**

1. Ability to change font types in note editor
2. Ability to highlight in note editor
3. Add an advanced location filter
4. Add a drawing feature
5. Ability to move images and voice memos around the note

iii. **Missing Features:**

1. Rich text support for creating new templates
2. Template based prioritization based on location
3. Ability to remove attachments (voice memo, images) from note

iv. **Nits**

1. (none here since these are at the lowest priority)

4. **Daily Scrums**

a. Scrum Meeting #1

i. Participants:

1. **Anthony Tran**

a. What have I done since the last meeting?

- i. Since this was the first meeting, I didn't have much to discuss with the team, but I said that I would look into some issues that presented themselves during some testing.

b. What will I do today to meet the Sprint goal?

- i. Look into past documentation regarding any errors, and dive deep into the app with a QA mindset to see if I can break anything and be very nitpicky about things.

- c. Do I see any impediments?
 - i. N/A

2. Arsalan Ghogari

- a. What have I done since the last meeting?
 - i. Look into specific location capabilities and filtering.
- b. What will I do today to meet the Sprint goal?
 - i. I will modify the codebase to see if repeat locations be saved and sorted.
- c. Do I see any impediments?
 - i. No

3. Himanshu Jain

- a. What have I done since the last meeting?
 - i. Worked on trying to add and test the UI/rich text support elements from the main note to the template creation
- b. What will I do today to meet the Sprint goal?
 - i. Continue working on this and getting at least all the elements in the template section
- c. Do I see any impediments?
 - i. Nope!

4. Miheer Tongaonkar

- a. What have I done since the last meeting?
 - i. Identified the left-alignment issues in the Tag Creation and Template Creation UIs
- b. What will I do today to meet the Sprint goal?
 - i. Experimented with padding and formatting options.
- c. Do I see any impediments?
 - i. No

5. Rishi Jain

- a. What have I done since the last meeting?
 - i. I looked into some of the failing test cases in feature 2, both black and white box tests.
- b. What will I do today to meet the Sprint goal?
 - i. I will let Anthony know that I can't test them properly because I need the API key.
- c. Do I see any impediments?
 - i. No

- ii. Date & Time:
 - 1. 11/25/25: 3:30 - 4:00 PM
- iii. Location:
 - 1. Zoom
- b. Scrum Meeting #2
 - i. Participants:
 - 1. Anthony Tran**
 - a. What have I done since the last meeting?
 - i. I've looked deeply into the app and constructed a proper plan for the sprint, essentially adding on to what my teammates said and making everything more organized and cohesive.
 - b. What will I do today to meet the Sprint goal?
 - i. I'll start working on the Places API bug and some UI fixes.
 - c. Do I see any impediments?
 - i. N/A
 - 2. Arsalan Ghogari**
 - a. What have I done since the last meeting?
 - i. I have seen the possibilities on how granular we can filter.
 - b. What will I do today to meet the Sprint goal?
 - i. I will add a filter for specific locations
 - c. Do I see any impediments?
 - i. No
 - 3. Himanshu Jain**
 - a. What have I done since the last meeting?
 - i. Finished adding the rich text support to the templates
 - b. What will I do today to meet the Sprint goal?
 - i. Starting to work on the location-based prioritization
 - c. Do I see any impediments?
 - i. Nope!
 - 4. Miheer Tongaonkar**
 - a. What have I done since the last meeting?
 - i. I have adjusted the left-alignment for the Tag Creation UI.
 - b. What will I do today to meet the Sprint goal?

- i. I will experiment with the Template Creation UI in order to find the appropriate formatting.
- c. Do I see any impediments?
 - i. No

5. Rishi Jain

- a. What have I done since the last meeting?
 - i. I've now successfully completed the test case fix and am going to discuss with the team on what I can do to help next.
- b. What will I do today to meet the Sprint goal?
 - i. After discussing with the team, I have decided to work on improving text stylization.
- c. Do I see any impediments?
 - i. No

ii. Date & Time:

- 1. 11/26/25: 3:30 - 4:00 PM

iii. Location:

- 1. Zoom

c. Scrum Meeting #3

i. Participants:

1. Anthony Tran

- a. What have I done since the last meeting?
 - i. I've worked a bit with Miheer on improving the UI design and decided that I will use a picker for the date range filter for a more minimalistic design, which was something we were aiming for since the beginning.
- b. What will I do today to meet the Sprint goal?
 - i. After discussing with the team, we have decided to use a picker design so I will add that in and explore other features that may need to be added
- c. Do I see any impediments?
 - i. N/A

2. Arsalan Ghogari

- a. What have I done since the last meeting?
 - i. I have looked into the capabilities for adding a drawing feature.
- b. What will I do today to meet the Sprint goal?

- i. I will implement a UI that allows user input in the form of pen touch or drawing.
- c. Do I see any impediments?
 - i. Yes, it might be a lot to implement within a Sprint, but not sure.

3. Himanshu Jain

- a. What have I done since the last meeting?
 - i. More or less finished the prioritization (I want to test out some edge cases)
- b. What will I do today to meet the Sprint goal?
 - i. Finish up the prioritization and start implementing image/voice memo removal
- c. Do I see any impediments?
 - i. Nope!

4. Miheer Tongaonkar

- a. What have I done since the last meeting?
 - i. I have fixed the padding for the Template Creation UI, and the alignment looks good.
- b. What will I do today to meet the Sprint goal?
 - i. I will ensure that the buttons within the UI are aligned as well.
- c. Do I see any impediments?
 - i. No

5. Rishi Jain

- a. What have I done since the last meeting?
 - i. I added the ability to highlight text as yellow and explored potential other stylization techniques by analyzing google docs.
- b. What will I do today to meet the Sprint goal?
 - i. I've decided that I will add different text sizes and maybe think of a redesign for our current voice memos system since it's a little wonky.
- c. Do I see any impediments?
 - i. No

ii. Date & Time:

1. 11/30/25: 3:30 - 4:00 PM

iii. Location:

1. Zoom

d. Scrum Meeting #4

i. Participants:

1. Anthony Tran

- a. What have I done since the last meeting?
 - i. I've looked into some issues regarding our current location feature and am working on a fix.
- b. What will I do today to meet the Sprint goal?
 - i. Right now, I need to ensure that the "Save" button triggers the "Add new location" prompt instead of when I just enter the note, because that gets annoying fast if I'm just trying to scan through my notes.
- c. Do I see any impediments?
 - i. N/A

2. Arsalan Ghogari

- a. What have I done since the last meeting?
 - i. Mostly implemented the drawing feature,
- b. What will I do today to meet the Sprint goal?
 - i. I will ensure that it is possible for users to save the drawings after making them.
- c. Do I see any impediments?
 - i. No

3. Himanshu Jain

- a. What have I done since the last meeting?
 - i. Worked a little on the image/voice memo removal, but was unsure how to place the delete/X button
- b. What will I do today to meet the Sprint goal?
 - i. Figured out where the X button should go, so I'll work and finish up on that
- c. Do I see any impediments?
 - i. No, we resolved that single impediment during this meeting

4. Miheer Tongaonkar

- a. What have I done since the last meeting?
 - i. I made some minor edits to center the buttons after the changes I made to the Template Creation UI.
- b. What will I do today to meet the Sprint goal?

- i. I will test the functionalities of the UI and ensure that whitespace is not clickable.
- c. Do I see any impediments?
 - i. No

5. Rishi Jain

- a. What have I done since the last meeting?
 - i. I was able to add different fonts and thought of a new way to add the voice memo (there will be a big red button below to show that there is indeed audio being recorded).
- b. What will I do today to meet the Sprint goal?
 - i. I will continue to explore the voice memo feature until I get all the kinks sorted out.
- c. Do I see any impediments?
 - i. No
- ii. Date & Time:
 - 1. 12/1/25: 3:30 - 4:00 PM
- iii. Location:
 - 1. Zoom

e. Scrum Meeting #5

i. Participants:

1. Anthony Tran

- a. What have I done since the last meeting?
 - i. I finished up all the location UI issues and am currently surveying for any remaining bugs or UI improvements.
- b. What will I do today to meet the Sprint goal?
 - i. I will continue to iron out any bugs as I see them, or report them to the team in text chat if I am overwhelmed.
- c. Do I see any impediments?
 - i. N/A

2. Arsalan Ghogari

- a. What have I done since the last meeting?
 - i. I have finished the drawing feature.
- b. What will I do today to meet the Sprint goal?
 - i. I will wrap up and make sure there are no remaining bugs.

- c. Do I see any impediments?
 - i. No

3. Himanshu Jain

- a. What have I done since the last meeting?
 - i. Almost finished the removing image/voice memo feature, just dealing with some bugs and weird edge cases
- b. What will I do today to meet the Sprint goal?
 - i. Just finishing this up
- c. Do I see any impediments?
 - i. Nope!

4. Miheer Tongaonkar

- a. What have I done since the last meeting?
 - i. I have double checked the UI to make sure it didn't break with the other team members' changes.
- b. What will I do today to meet the Sprint goal?
 - i. Wrap up final touches
- c. Do I see any impediments?
 - i. No

5. Rishi Jain

- a. What have I done since the last meeting?
 - i. I found a bug with the highlight where I wasn't able to remove a highlight so I fixed that.
- b. What will I do today to meet the Sprint goal?
 - i. Work with Arsalan to ensure that the stylization saving is working correctly.
- c. Do I see any impediments?
 - i. No

- ii. Date & Time:
 - 1. 12/2/25: 3:30 - 4:00 PM

- iii. Location:
 - 1. Zoom

5. Sprint Review

- a. Meeting:
 - i. Date & Time
 - 1. 12/3/25: 10:00 - 10:45 PM
 - ii. Location
 - 1. Zoom

- iii. What has been done?
 - 1. Nearly everything that was in our Sprint Backlog has been completed, aside from the Pomodoro timer because we didn't feel that it aligned with the goals of our app. The Pomodoro feature is best left for another app or a Pomodoro website (which many of us have already used before). The Pomodoro was never really planned. When comparing the README.md to the sprint backlog, there aren't many differences.
- iv. What was planned but wasn't completed, and why?
 - 1. The ability to add multiple voice memos and the ability to move the attachments around the note was unfortunately not able to be completed. This was due to the fact that we had some time constraints and ran into some merge conflicts along the way which impeded the progress of our project.
- v. What went well during the sprint?
 - 1. During the sprint, everyone contributed greatly to the enhancement of our project and everyone communicated well to voice their concerns, especially if they didn't have time to complete a task due to issues outside of class. This was an improvement compared to 2.3.
- vi. What could be improved going forward?
 - 1. Going forward, we would benefit from starting as early as possible rather than waiting until the last week or so to complete our goals. This would ensure that we meet all of our sprint goals next time around (assuming an alternate universe where we run it back as a team).
